Aneetta Abraham

Princeton, TX, 75407; (682)331-6578; aneettabetty5@gmail.com; LinkedIn

EDUCATION EXPERIENCE

Boston University August 2026 - Present

- *Master of Science in Computer Science and Artificial Intelligence*

The University of Texas at Dallas December 2024

- *Bachelor of Science, Software Engineering*
- *Member, Society of Women Engineers*
- *Volunteer Coordinator, Malayalee Comet Association*
- Summary: Detail-oriented Software Engineering graduate with experience in requirements review, test case development, UAT, programming and system validation. Skilled in Python, Java, SQL, and problem-solving, with a strong ability to collaborate across teams, analyze system functionality, and support software improvements that enhance accuracy, efficiency, and user experience.

Collin College, Plano August 2021

- *Associate in Science, Major: Biology*

PROFESSIONAL EXPERIENCE

National Life Group, Addison, TX May 2025 - Present

Associate Illustration Systems Analyst

- Supported new insurance product implementation initiatives by reviewing business and system specifications, creating detailed test cases, executing UAT testing
- Developed and executed test scenarios for product enhancements, system updates, and defect fixes, ensuring accurate results across various policy and product scenarios.
- Performed user acceptance testing to validate system functionality, calculation accuracy, screen behavior, and end-to-end processing before production deployment
- Participated in specification reviews and project discussions to identify gaps, clarify requirements, and reduce downstream testing or implementation issues
- Documented defects, tracked issues through resolution, and collaborated with business analysts, developers, QA teams, and product stakeholders to support timely releases

ACADEMIC PROJECT EXPERIENCE

Knowledge Management Assistant

- Developed a search-enhancement application using NLP for filtering, summarizing, and storing search results
- Followed the Waterfall methodology for requirements, design, implementation, and testing
- Built system architecture with React.js, Python Flask, and MySQL database for knowledge management

Algorithm Design and Implementation in Java

- Implemented a generic merge sort algorithm supporting both Comparable and Comparator interfaces, enabling flexible sorting functionality for diverse data types in Java.
- Developed and tested efficient sorting solutions for complex datasets, including custom objects like java.sql.Date, ensuring robust and reusable code for real-world applications.

Design of a 3D Maze Game in Unity

- Developed a physics-based 3D maze game with collision detection, UI design, and Git-based collaborative development

ADDITIONAL INFORMATION

- Technical skills: Java, C++, Python, secure coding practices, data structures and algorithms, Git and GitHub, Database and SQL knowledge, communication and collaboration, Problem-solving and critical thinking, IDEs, operating system, basics of testing, Encryption and Cryptography, debugging, OOP & design, Microsoft Office
